## Beschreibung

First you cross the double arched Bridge (Ponte dei Salti) and hike up the valley with the river to your right. You continue inside the woods until you reach the large street bridge of Ganne. Cross over to the right (on the street) and you see a small gate that brings you back to the path. Continue the hike with the river to your left, following the signs towards Sonogno, but staying with the river to your left. In Frasco you cross the river again and continue the path to Sonogno. The path is well labeled.
